[Scene 1: Typing on a Website]

🎵 Upbeat music plays

Rebecca sits at their laptop, looking puzzled.

My: "Okay… How do I even talk to an AI properly?"

They hesitantly type a vague prompt: "Tell me about stuff."

[Scene 2: AI Diva Comes to Life]

The screen shakes, and suddenly—💥 BAM!—AI Diva pops out of the screen in a fabulous, digital-glitchy entrance.

AI Diva (rolling her eyes): "Ugh, honey, stuff? Really? You gotta do better than that."

[Scene 3: Learning AI Prompting with Sass]

AI Diva strikes a pose, pointing to an on-screen tutorial.

AI Diva: "Listen, sweetie, AI needs clear, precise prompts. We're not mind readers—well, not yet!"

A quick-cut montage of Diva guiding the user:

Wrong Prompt: "Tell me about history."

AI Diva snaps its fingers: "BORING. Which history? Dinosaurs? Medieval feasts? The rise of AI Divas? Be specific!"

Corrected Prompt: "Explain how AI is used in education today."

AI Diva cheers: "Now we're talkin'! See? Be clear, be smart, and I won't have to roll my digital eyes at you."

[Scene 4: The AI Mini-Game]

Then My plays a guessing game with AI Diva.

AI Diva: "I'm thinking of an object… but can you ask the right questions to figure it out?"

Quick flashes of incorrect vs. correct guesses, leading to victory! 🎉

[Scene 5: Conclusion – Why AI Literacy Matters]

AI Diva winks at the camera.

AI Diva: "Alright, superstar, now you know how to talk to AI like a pro. No more 'um, tell me stuff.' Go slay those prompts!"

Then Rebecca gives a thumbs up as AI Diva dramatically flips back into the screen.

[Final Screen: Call to Action]
